## Projects

---

### Memory Game

- <https://sanath-vishwanath.github.io/Memory-Game/>
- The project is a Memory Game built using HTML, CSS, and JavaScript. The game is a classic card matching game where the player has to match pairs of cards with the same image on them.

### Real-Time Chatroom

- <https://sanath-vishwanath.github.io/Chatroom/>
- A basic Real-Time Chatroom using HTML, CSS, and JavaScript. Uses Firebase for storing and retrieving chats as well as Local Storage for some basic information.

### Weather app

- <https://sanath-vishwanath.github.io/Weather-App/>
- The project is a weather web app built using HTML, CSS, and JavaScript. It interacts with the AccuWeather API to fetch weather data and display it to the user. The user can search for the current weather of any location by entering the city name.
